

Day 23 - Final Validation

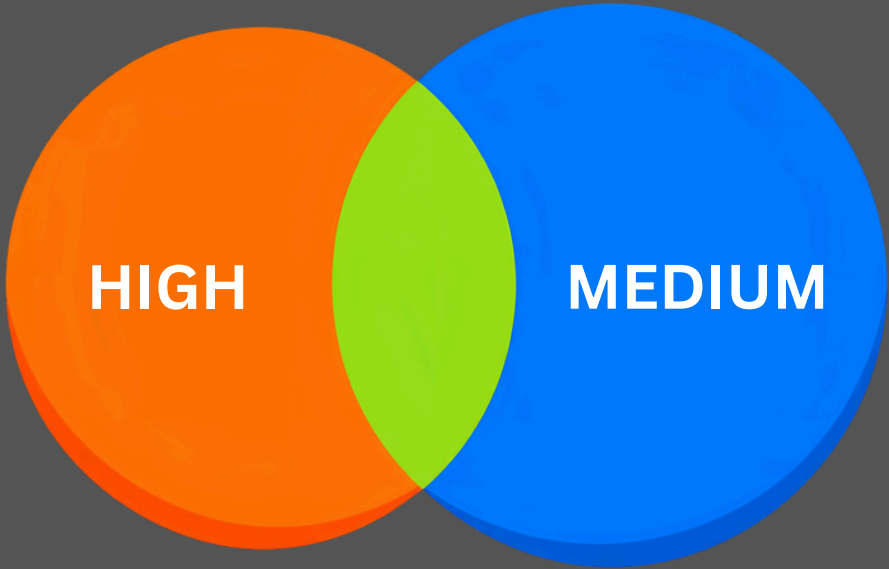

Final Validation Results

Metric	SVM
Accuracy	75.83%
Precision	84.62%
Recall	46.81%
F1 Score	60.27%
BER	0.242
Inference Time	Very Low

Runtime Analysis :

- Higher classification performance
- Better BER performance
- Slightly slower than Logistic Regression

Accuracy–Complexity Trade-off

SVM provides best classification performance,Also some complexity

Final Validation Summary :

- Final validation performed using held-out test data.
- No data leakage observed.
- Model performance consistent with cross-validation findings.
- SVM approved as final UWOC bit classifier.
